Concurrent and Cache-Efficient Build Container Image with BuildKit

Lightning Talks

Ananda Dwi Rahmawati

Cloud Engineer at Btech

CLOUD NATIVE
COMPUTING FOUNDATION

Agenda

- Introduction to BuildKit
 - What is it?
 - What are the features?
 - How to Getting Started?

What is BuildKit?

BuildKit is a powerful modern toolkit to convert source code to build artifacts with efficient, expressive and repeatable manner features.

What are the Features?

<https://github.com/moby/buildkit#buildkit>

How to Getting Started?

Click on: <https://git.io/JXx9X>
