

Ananda Dwi Rahmawati

ananda.dwirahmawati313@gmail.com ♦ (65) 9358-2201 ♦ Singapore, SG

Senior Cloud & DevOps Engineer with 6+ years of experience architecting, automating, and optimizing public cloud solutions (AWS, Azure, GCP) for mission-critical environments. Proven track record in cost optimization (70%+ savings), security and compliance, and leading cross-functional teams to deliver robust, scalable, and secure cloud platforms. Recognized as AWS Container Hero and Google Developer Expert. Expert in IaC (Terraform, Pulumi), CI/CD (GitLab, Jenkins), and cloud-native architectures. Passionate about documentation, process improvement, and mentoring.

Skills

- Hardware & Operating Systems: Server, Storage, Network; Enterprise Linux (RHEL, Ubuntu, SUSE, Oracle Linux), Windows Server
- Networking & Security: Subnetting, TCP/IP, VLANs, Routing & Switching, Firewalls (Cisco, Mikrotik), VPN, SD-WAN, Zero Trust, AWS VPC, Transit Gateway, PrivateLink, Direct Connect, AWS WAF, Azure Firewall, Cloud Armor, Private DNS, Route 53, AWS Global Accelerator
- Compute & Containers: AWS ECS, Fargate, Lambda, EC2 Auto Scaling; Kubernetes (EKS, K3s, GKE), Docker, Podman, CRI-O, Containerd, OpenShift, Docker Swarm, Helm
- Storage & Databases: S3, EBS, EFS, FSx, Glacier; RDS (PostgreSQL, MySQL), Aurora, DynamoDB, MariaDB, Cloud SQL; Ceph, GlusterFS, Rook; AWS Athena, AWS Glue, Object versioning & lifecycle policies
- Backup & Disaster Recovery: AWS Backup, Azure Backup, GCP Persistent Disk & Cloud SQL snapshots, Velero
- Observability & Monitoring: AWS CloudWatch, CloudTrail, X-Ray, Trusted Advisor; Prometheus, Grafana, ELK, StackOps, Datadog, Azure Monitor, GCP Operations Suite, CloudWatch Synthetics, OpenTelemetry, Grafana Loki
- CI/CD & Automation: Jenkins, GitLab CI/CD, GitHub Actions, ArgoCD; AWS CodePipeline, CodeBuild, CodeDeploy, CodeStar; AWS CDK, Pulumi, Terraform, CloudFormation, Ansible, Puppet; Azure DevOps, Azure Pipelines, Azure Repos, Azure Artifacts; Secrets rotation automation
- Security & DevSecOps: IAM, KMS, Secrets Manager, Security Hub, GuardDuty; CodeSCAPE, CloudSCAPE, VAPT remediation, SAST/DAST, container image scanning, vulnerability management
- Service Mesh & API Management: Envoy, Istio, Linkerd, AWS App Mesh; API Gateway (AWS, Azure)
- Windows Administration: Active Directory, File & Storage Services, IIS, RDP, WSUS
- Version Control: Git, AWS CodeCommit, Azure Repos
- Programming & Scripting: Python, Bash, Go, Java
- GovTech Singapore Stacks: GCC 1.0/2.0/+, CStack, StackOps, CloudSCAPE, CodeSCAPE, TechBiz, TechPass, IM8, SGTs tools, CAM, Splunk

Work Experience

ACP Group (Outsourced to GovTech Singapore)

Oct 2024 – Present

Cloud & DevOps Engineer (Cloud File Transfer Product)

Singapore, SG

- Led AWS cloud operations for large-scale, multi-environment platforms, driving provisioning, monitoring, compliance, and cost optimization.
- Orchestrated migration from legacy to modern AWS infrastructure using Terraform and Pulumi, boosting automated configuration coverage from 54% to 85% and ensuring 100% monitoring coverage.
- Achieved full OIDC adoption by migrating IAM secrets and access keys to OIDC in GitLab CI/CD, eliminating long-lived credentials and enhancing security posture.
- Designed and implemented end-to-end observability and monitoring (CloudWatch, CloudTrail, X-Ray, Lambda, ElasticSearch, Logstash, Kibana, CloudWatch Synthetics), enabling proactive detection, canary deployments, and automated recovery.
- Built and maintained scalable CI/CD pipelines in GitLab for UAT, staging, and production, incorporating drift

detection, security validation, and manual approval gates.

- Implemented ECS and RDS Auto Scaling; partnered with QA to performance test 100+ ECS services, improving reliability and reducing response times.
- Drove DevSecOps adoption by integrating SonarQube and Snyk into GitLab workflows; enforced continuous compliance with AWS Config, remediating 100+ IAM policy vulnerabilities.
- Automated security and compliance: VAPT remediation, container hardening, patching, log retention, KMS encryption, and AWS security best practices.
- Developed infrastructure compliance scoring and reporting automation for 200+ projects, supporting audit and governance requirements.
- Enhanced security and connectivity with AWS PrivateLink, Transit Gateway, and WAF; optimized CloudFront for 35% lower latency and improved throughput.
- Automated ECR image scanning and patching, remediating 200+ vulnerabilities pre-production.
- Led incident response and troubleshooting with cross-functional teams, ensuring rapid root-cause analysis and resolution.
- Served as Scrum Master, driving agile delivery, sprint planning, and cross-team collaboration via Jira and Slack.
- Implemented automated cost and resource optimization using AWS Trusted Advisor, Config Rules, and Lambda cleanup scripts, and collaborated with finance and engineering teams to establish FinOps best practices—reducing cloud spend by identifying and eliminating idle and underutilized resources.

Activate Interactive Pte Ltd

Oct 2023 – Sept 2024

Cloud & DevOps Engineer

Singapore, SG

- Architected and managed secure cloud platforms on AWS and Alibaba Cloud, enabling compliant, high-throughput data exchange (100TB+ daily) across 100+ agencies via SFTP, HTTPS, and APIs.
- Led migration from on-premises to AWS, modernizing infrastructure with Terraform and Pulumi; increased automated configuration coverage from 54% to 90% and delivered \$500K+ annual cost savings.
- Designed and implemented enterprise-grade CI/CD pipelines (GitLab, AWS CodeCommit, CodePipeline) and DevSecOps practices for 100+ microservices, integrating automated security scans (SonarQube, Snyk, DAST), compliance enforcement, and vulnerability remediation.
- Deployed and managed network, compute, and storage resources (VPC, ECS, RDS, ALB, Function Compute, KMS, S3, Glue, Lambda) across multiple zones and cloud providers.
- Designed, deployed, and migrated secure, scalable solutions on Microsoft Azure—including Virtual Networks, Azure Firewall, and Active Directory integration—while optimizing performance and cost using Azure Cost Management and Azure Advisor.
- Automated configuration management for RHEL and Windows servers using Ansible, DSC, and PowerShell, ensuring CIS compliance and reliable service delivery.
- Enhanced reliability and observability by deploying advanced monitoring, alerting, and automated recovery (CloudWatch, CloudTrail, X-Ray, ElasticSearch, SLS, Prometheus, Grafana), supporting zero-downtime deployments and proactive incident response.
- Automated cost and resource optimization using AWS Trusted Advisor, Config Rules, and Lambda cleanup scripts, eliminating idle resources and improving operational efficiency.
- Developed and maintained infrastructure as code (Terraform, CloudFormation) for scalable, secure, and auditable cloud environments, including cross-account S3 transfers, security policies, and compliance validation.
- Led technical teams as Scrum Master, optimizing agile delivery through sprint planning, stand-ups, and retrospectives; improved team velocity by 35% and strengthened cross-functional collaboration.
- Facilitated incident response and root-cause analysis, coordinating with stakeholders via Slack and Jira to ensure timely resolution and continuous improvement.
- Implemented cloud cost management practices using AWS Cost Explorer, Azure Cost Management, and custom dashboards, enabling proactive budget tracking and cost optimization.
- Produced and delivered detailed technical documentation (architecture guides, integration manuals, RCA reports) for knowledge transfer and stakeholder transparency.
- Managed stakeholder communications, translating complex technical concepts into clear, actionable insights for

business and IT leaders.

PT Boer Technology

July 2019 – Sept. 2023

Cloud Infrastructure Engineer

Bogor, Indonesia

- Architected and deployed multi-region OpenStack and Ceph-based cloud platforms, serving 500+ enterprise clients with 99.9% availability through automated provisioning and Kubernetes orchestration.
- Led migration and modernization across AWS, GCP, and Alibaba Cloud, reducing operational costs by 40% and boosting application performance by 60% via microservices adoption and database optimization.
- Automated infrastructure provisioning and application deployments using Azure DevOps, Azure Pipelines, and ARM templates.
- Designed and implemented enterprise-grade monitoring and alerting (Prometheus, Grafana, Alertmanager) across 300+ instances, maintaining 99.5–99.9% service availability.
- Built and managed CI/CD pipelines with GitLab, integrated automated security testing (OWASP ZAP, Burp Suite), and delivered containerized applications using Docker Swarm and Kubernetes, increasing deployment frequency by 10x.
- Managed and optimized MySQL clusters, performed database recovery, and implemented inventory management for 50+ clusters in government and research environments.
- Delivered infrastructure design solutions and pricing for \$2M+ in client engagements, and led internal research on cloud, storage, security, and automation technologies.
- Automated daily reporting and documentation (RCA, technical docs, wiki), streamlining knowledge transfer and operational transparency for clients and teams.
- Configured and maintained web servers (Apache, Nginx), mail servers (Postfix, SendGrid), DNS (Cloudflare), and implemented SSL/TLS security.
- Upgraded and containerized legacy applications (PHP, Django) with minimal downtime, and managed large-scale OS upgrades (Ubuntu 16.04 to 22.04).
- Implemented centralized logging (ELK), alerting (Telegram, Email), and performance monitoring for proactive issue detection and resolution.
- Conducted pre-sales solution design, pricing, and manday calculations for client projects, and improved process compliance by aligning cloud operations with QMS and ITIL standards to ensure audit readiness and operational consistency.
- Led internal migrations (Google Workspace to Microsoft 365 for 300+ users) and deployed internal tools (Bookstack, Jumpserver, Odoo, GitLab HA).
- Led cross-functional teams and mentored junior engineers, fostering a culture of knowledge sharing and continuous improvement.
- Researched and piloted new technologies: object storage, automation, security, DevSecOps, CI/CD, and cloud-native platforms.

Part-Time or Freelance

2021 - present

Freelance Trainer

Indonesia, ID

- Delivered technical training to 1,000+ professionals across banking, government, and private sectors, achieving 95%+ positive participant feedback and driving large-scale upskilling in cloud, DevOps, and security.
- Developed and facilitated hands-on curricula for Mastercard Academy 2.0 and Google Bangkit Academy, enabling practical expertise in GCP, AWS, Kubernetes, CI/CD, and ELK Stack.
- Designed and delivered advanced training and labs on GCP Core Infrastructure, Security, Architecture, and cloud computing, as well as ELK Stack and DevOps/CI/CD implementations for diverse clients.
- Led certification programs (CompTIA Linux+, Security+) and cloud workshops, supporting students and professionals in achieving industry-recognized credentials.
- Created comprehensive training materials, assessments, and real-world labs to ensure effective learning outcomes, participant engagement, and measurable skills improvement.

Educations

University of Texas at Austin

Master Degree - Computer Science

- GPA 3.77/4.00

Jan 2025

Distance Learning

Universitas Gadjah Mada

S.Tr.Kom, Software Engineering Technology

- GPA 3.84/4.00

Jul 2019 – Feb 2023

Yogyakarta, ID

Certifications

- HashiCorp Certified: Terraform Associate (003)
- Linux Foundation Certified System Administrator (LFCS)
- The Linux Foundation Certified IT Associate (LFCA)
- AWS Certified (Cloud Practitioner, Solutions Architect - Associate)
- CompTIA Security+ ce Certification
- Google Certified (Associate Cloud Engineer, Professional Cloud Architect)
- Microsoft Certified (Azure Fundamentals AZ-900, Azure Administrator Associate AZ-104)
- Oracle Cloud Infrastructure Certified (Foundations Associate, Cloud Operations Associate)
- Alibaba Cloud Certified (ACASecurity Associate, ACA Cloud Computing)
- MikroTik Certified (MTCNA, MTCRE, MTCWE, MTCSE, MTCTCE, MTCUME, MTCINE)
- LSP TIK Indonesia (Junior Networking)
- Certified OpenStack Administrator, COA

Awards

- AWS Container Hero, 2023 - present
- Google Developer Expert - Cloud Modern Architecture, 2023 - present
- CNCF Ambassador, 2023 - 2024

Community Involvement

- Speaker at Google Cloud Summit Jakarta 2025 - Advanced Scheduling for AI/ML: Orchestrating Ray Applications with KubeRay and Kueue
- Speaker at AWS Summit Singapore 2024 - Multi-Cluster Security with Network Firewall: Consistent Protection for Distributed EKS
- Speaker at Azure Community Conference 2021 – Continuous Delivery using Spinnaker on Azure.
- And still many more here <https://misskecupbung.wordpress.com/talks>

Organization Records

- Kubernetes and Cloud Native Indonesia, 2023 - present
- AWS User Group Indonesia, 2020 - present
- Google Developers, 2019 - present
- Infrastructure Team - BlankOn Linux Indonesia, 2017 - 2020
